

Lowerable Pole Innovation

www.ezypole.com

EZYpole's Innovative Design

Ezypole's innovative range of lowerable poles has revolutionised the pole industry by reducing installation and on-going maintenance costs. We are now one of the leading pole suppliers to the private and public sectors around the world.

Our range of lowerable poles eliminate the use of any elevating working platforms and heavy lifting equipment such as cranes, which in turn eliminates O.H&S issues. Other benefits include easily accessing equipment at ground level in a matter of minutes through controlled lowering, this is done via a attachable manual winch system or simply walking the pole up or down with one or two men.

Whether you need to change a light fitting, clean a solar panel, upgrade radio transmitting equipment or just simply adjust a camera lens, the advantages of a lowerable pole will save you time and money in the long run.

APPLICATIONS

- ◆ Exterior Lighting
- ◆ Solar Lighting
- ◆ CCTV Security
- ◆ Time Lapse Cameras
- ◆ Weather & Monitoring Equipment
- ◆ Transmission & Radio Antennas
- ◆ Advertising & Signage
- ◆ Temporary Installations

KEY BENEFITS

Transmission

Instruments

Pole Lowering Progression

KEY BENEFITS

- ◆ Suitable for all industrial and public access areas.
- ◆ Tilting of pole can usually be carried out by a single operator.
- ◆ Stable structure for all types of lighting, CCTV, Monitoring and solar applications.
- ◆ Demountable winch assembly allows for a safe installation whilst also reducing costs on multiple installations.
- ◆ Constructed in high tensile steel and hot dip galvanised after fabrication for durability.

Personnel Required for Installation	
Installation Time	30-60 minutes
